Czech

OBJECTIVE

Highly-motivated Junior Data Science Specialist, with experience in Python: pandas and numpy. Expertise in visualization technologies: such as matplotlib, seaborn and other broadly used data analytical tools . I am also familiar with GIT, Kaggle notebooks and ODS. I enjoy creative problem solving and getting exposure on multiple projects, and engage in the Data Science field. Currently looking forward to joining a major organization to utilize my skills and experience.

EDUCATION

Skill Factory: Data science school

Online

Dec 2020 - present

Biggest data science school in Russia.

BA, Skoda Auto University

Prague

Sep 2019 - Jan 2021

I successfully completed three semesters as student with HR major in Skoda Auto University in Prague.

Successfully graduated, Prague Education Center

Sep 2018 - Aug 2019

Brno

Czech Language School with the rights to run official language state exam. Successfully graduated with B2 level.

HOBBIES

Beside of data science I also like to build bots , especially for Telegram. MalibuParty2bot [link] is Truth or Dare bot-game which has 1000+ happy customers..

COVID19 [link] bot is free to use and it shows basic statistics about coronavirus around the world for every country.

TikTok Booster bot [link]. It collects data about TikTok videos and, using statistical tests, shows what parameters make users' TikToks more popular so that a user knows what to focus on.
